WELCOME ADDRESS BY THE GOVERNOR OF THE LENINGRAD REGION

Dear Friends,

The economics of the Leningrad Region continues its progressive advance. Our region has been exporting manufactured products in one-half of all countries of the world for past six years. This is a high indication of export orientation of the territory, wide specialization of produced items that are offered in the international market. Therefore, support of export becomes particularly important for us.

One of the forms of such support is preparation of the catalogue “100 Exporters of the Leningrad Region” which can be found hereby. There you will find detailed information on the companies working in foreign markets. Their products are competitive, desired, and we have no doubts they will remain as such in future.

I hope our Catalogue will help our foreign colleagues to be better oriented in the variety of export proposals of the region and become a good guidance for them in their search for new business partners.

The Government of the Leningrad Region, in their turn, will continue making every effort to ensure the most favourable conditions for export of goods and services from our region and that all the goods and services that are worth to be introduced in foreign markets meet their buyers.

I wish our potential partners successful cooperation with the companies of the Leningrad Region, new positive contacts and profitable deals.

Governor of the Leningrad Region
Aleksandr Drozdenko

WELCOME ADDRESS BY THE DEPUTY CHAIR OF THE GOVERNMENT OF THE LENINGRAD REGION

Dear Colleagues,

Support for the export activities of companies is one of the development priorities of Russia. The Leningrad Region has always been an active exporting territory. Over the past five years, the number of exporters in the Leningrad Region has doubled, and the increase in non-resource exports has comprised 20%.

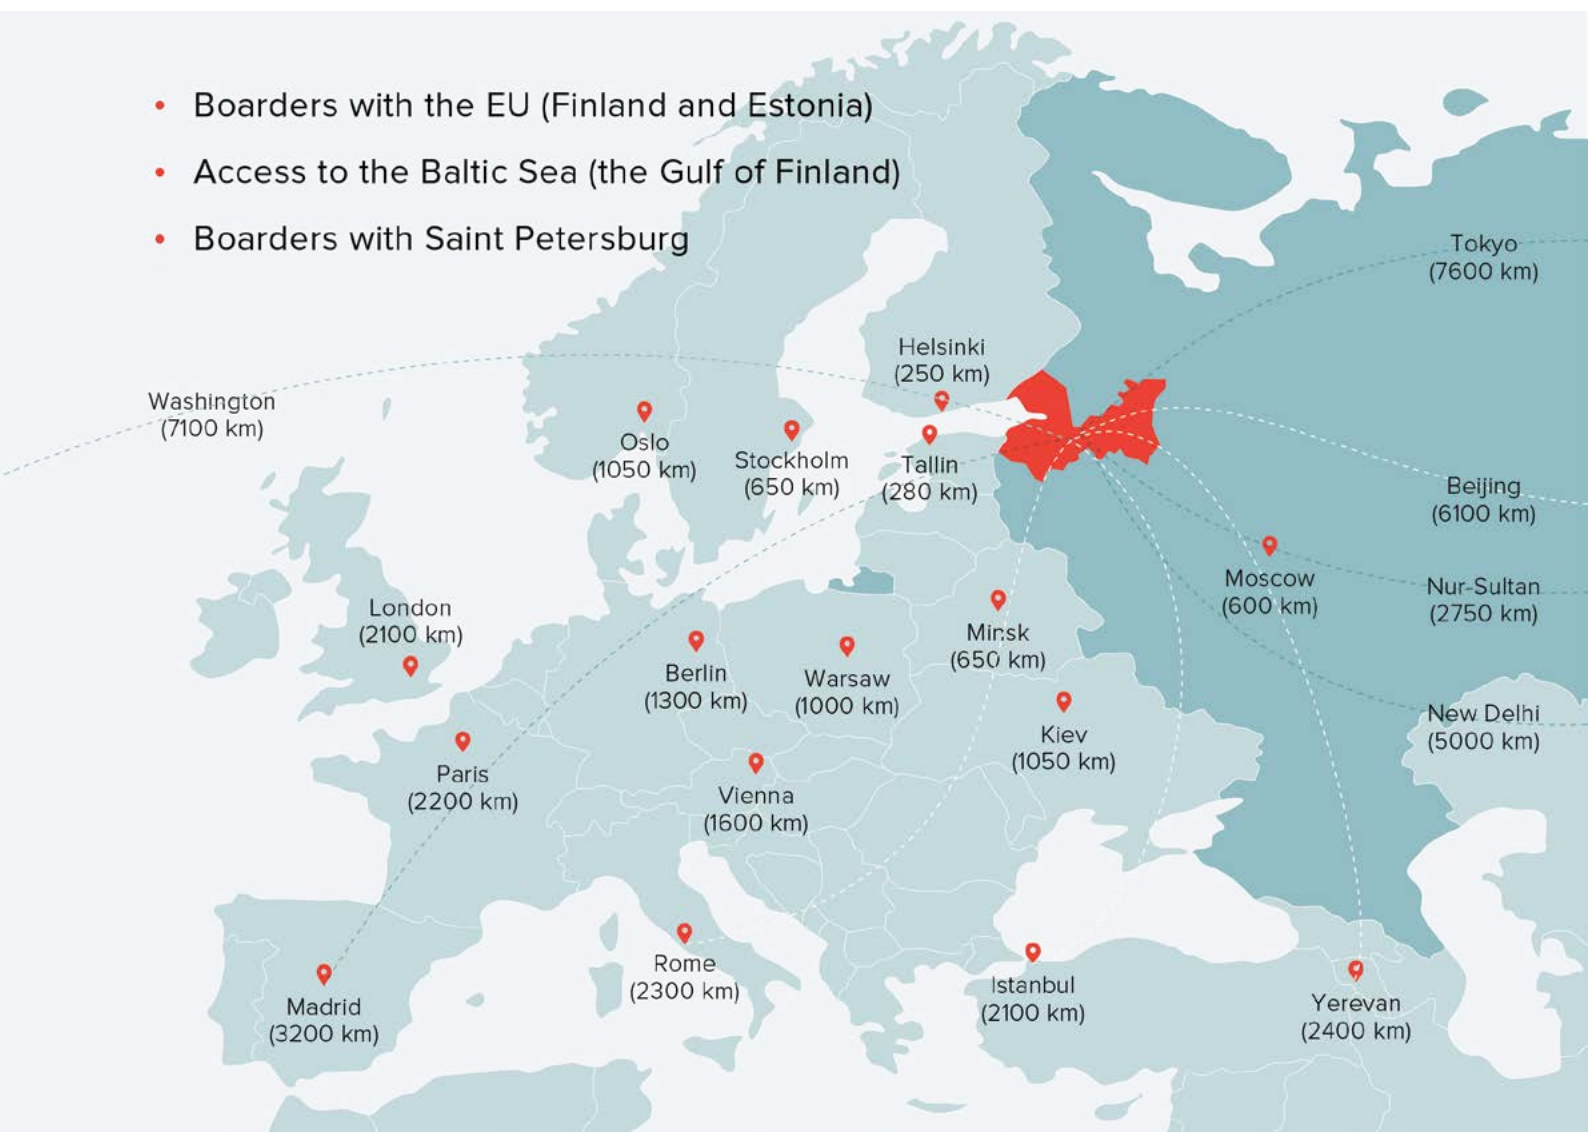

Our task is to stimulate the export activities of companies using effective support measures and creating favourable conditions. This will help the business companies to produce goods and services which are desired in the foreign market. A special institute for the development of export activities – the Leningrad Region Industry Development Center – was created and now operates in our region. Today, the center actively provides assistance to companies and renders all the variety of services related to access to the international market.

We are open to cooperation and stand assured of the quality of products made by the companies of the Leningrad Region. I hope this catalogue will become a good assistant in development of your business.

Deputy Chair of the Government of the Leningrad Region
Dmitry Yalov

GENERAL INFORMATION ABOUT THE LENINGRAD REGION

amount of exporters of products and services in 2018

> 130 countries
area of export supplies of the regional organizations

**WINNER OF THE CONTEST “EXPORTER OF THE YEAR 2017”
AMONG THE REGIONS OF RUSSIAN FEDERATION**

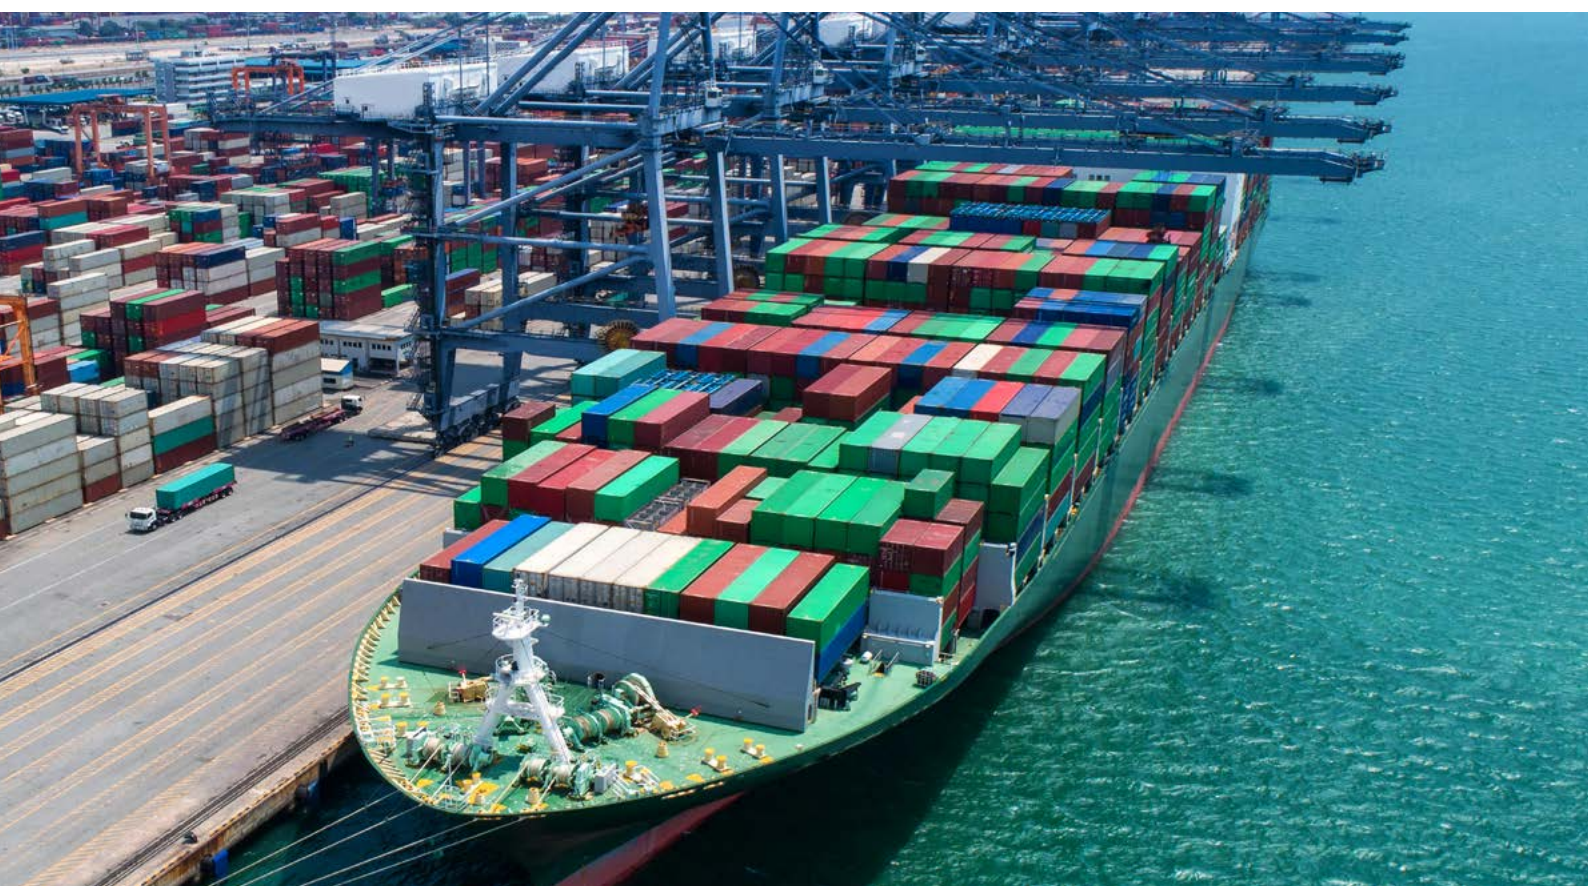

EXPORT SUPPORT

IN THE LENINGRAD REGION

Support for enterprises' export activities is one of the Russian Federation development priorities. The Government of the Russian Federation is committed to stimulate the export activities of small and medium-sized enterprises that implement their activities at the regional and municipal levels through support measures and creating a favorable environment for entrepreneurs to produce goods and services that are in demand in the foreign market. The volume of non-resource non-energy exports should reach \$250 billion by 2024.

Choosing a Russian enterprise as a partner, you make the right choice and you can be sure that all contractual obligations will be fulfilled completely, since one of the main conditions for state support provision to Russian exporters is fulfillment of all the obligations undertaken to foreign contractors. Most of the enterprises presented in the catalogue receive various export support.

If you decide to choose a regional company as a partner, a special agent of the Government of the Russian Federation, Roseximbank, can provide you or your partner bank with borrowed funds to purchase products from Russian enterprises. Russian exporters are entitled to receive a VAT recovery after providing the regulator with the necessary information on the export contract performance, which serves as an additional confirmation of the reliability of transactions with Russian companies. In addition, they have access to various financial support tools, including expenses for logistics and transportation, certification and product adaptation to the requirements of foreign markets.

In the Leningrad Region, a special institute for the development of export activities is the regional Export Support Center (division of Industry Development Center of the Leningrad Region). Over the past 5 years, the number of exporters in the Leningrad Region has doubled, and the increase in non-resource non-energy exports has comprised 20%. The main task of the center is to search for promising companies, develop their export competencies and provide export contracts.

Services of the Export support center:

- **EXPORT AUDIT OF THE ENTERPRISE AND RECOMMENDATIONS ELABORATION**
- **SELECTION OF OPTIMAL EXPORT COURSES FOR ENTERING FOREIGN MARKET**
- **FOREIGN MARKETS MARKETING RESEARCH**
- **ORGANIZATION OF BUSINESS MISSIONS AND COMPANIES' PARTICIPATION IN FOREIGN EXHIBITIONS**
- **SELECTION OF CONTRACTORS IN COOPERATION WITH REC AND RUSSIAN FEDERATION TRADE MISSIONS**
- **WORKSHOPS, CASE PRESENTATIONS AND EXPORT SUPPORT MEASURES**
- **ORGANIZATION OF TRAINING AND DEVELOPMENT OF COMPETENCES IN THE FIELD OF FOREIGN TRADE ACTIVITIES**
- **ELABORATION OF PRESENTATIONS, BOOKLETS AND OTHER MARKETING MATERIALS**
- **ASSISTANCE IN PRODUCTS ADAPTATION TO THE REQUIREMENTS OF TARGET MARKETS**
- **PROVISION OF ACCESS TO INTERNATIONAL ONLINE TRADING SYSTEMS**

In addition to individual services, the center provides comprehensive support for foreign market launches. Today, the center's export projects portfolio includes over 40 regional enterprises. Specialists of the center perform an export audit of regional enterprises and select the most promising ones. When choosing the partner organization of the Center as a counterparty you can be sure of reliability of the regional supplier.

In addition, the center can provide services for the selection of potential partners in the Russian Federation, our industry databases contain data on a wide range of organizations. The center has proven experience in selecting contractors in of timber industry, building materials production and others.

TIMBER PROCESSING INDUSTRY

Timber industry complex of the Leningrad Region ranks third in the area in terms of production, yielding only to fuel and food industry. The Leningrad industrial complex enterprises developed a steady trend towards deeper processing of wood and integrated use of raw materials. To ensure the competitiveness of domestic products in worldwide markets, and in the setting of production cost increase, enterprises start to gradually introduce non-waste wood processing technologies. Over 60 large and medium-sized enterprises currently operate in the Leningrad Region timber sphere.

MACHINES AND EQUIPMENT MANUFACTURE

Over 100 large and medium-sized enterprises in the Leningrad Region perform activities in the spheres of automotive industry, shipbuilding, industrial equipment manufacturing, car building, etc. A number of high-tech companies perform research and development activities together with innovation centers, research institutes, research and manufacture associations of our country, which confirms the importance of domestic activities in the research and technology solutions design and development.

ALEXANDROV RESEARCH INSTITUTE OF TECHNOLOGY (NITI)

ENTERPRISE DESCRIPTION

NITI (part of Rosatom) was established in 1962 as a state test site for shipboard nuclear power plants (NPP). During more than 50 years of work, NITI has become a major research center in the field of nuclear energy and today it is the only scientific and technological center in Russia for complex testing of transport NPPs, adjusting them on ground prototype stands to the required reliability and safety level.

Products released: inspection systems, radioactive waste management technologies, equipment for automated control systems, calculations means and methods, simulators, measuring tools (flow meters, level gauges), programming technologies.

Sales area: Russia, Belarus, China

EXPORT PRODUCTS

- **Equipment for nuclear power plants radiation control automated system (control units, power control unit blocks)**
- **Explosives detection unit**

FACTS

- 2010** Start of manufacturing

BALTIYSKAYA PROMISHLENNAYA KOMPANIYA JSC

ENTERPRISE DESCRIPTION

BPK group is an industrial machine-tool enterprises association, which occupies more than 8% of the machine tools consumption market in Russia. The group includes enterprises in the Leningrad region and St. Petersburg, the Ryazan region. Line of business: batch production, creation of new models of machine tools and production of pilot batches, engineering, service.

In cooperation with its partners, the enterprises of the Rosatom State Corporation, the company manufactures metal-cutting machines under the F.O.R.T. trademark. In cooperation with the Peter the Great State Polytechnic University, Moscow state university of technology STANKIN, methods of dual training are developed and specialized professionals are trained. The design office of the enterprise implements R&D in the field of mechanical engineering and materials science. Patents for unique hybrid additive units are obtained. Active research within the framework of digital production concept is performed.

Sales area: Russia, CIS countries, Pakistan

EXPORT PRODUCTS

- **Pipe-threading machines**
- **Turning machines**
- **HPM machining centers**
- **5-axis machining center**
- **Water Jet machines**

CONCERN OCEANPRIBOR JSC

ENTERPRISE DESCRIPTION

Concern Oceanpribor JSC is the largest enterprise for design and manufacture of hydroacoustic tools for submarines and surface ships of the Russian Navy and exported ships. Concern's enterprises perform full cycle R&D, batch production of equipment, maintenance in the fleets. In addition to the Navy armament, the Concern produces hydroacoustic systems for civilian ships, manned and uninhabited underwater vehicles and oil and gas producing offshore platforms, ultrasonic equipment for oil and gas and chemical enterprises. It is planned to expand the range of civilian systems, to develop new types of products, in particular, access to new markets - piezoceramics and electronic automotive components.

Military equipment sales area: Algeria, Vietnam, Egypt, India, Iran, China, Syria (through the state intermediary of Rosoboronexport JSC).

Sales of ultrasonic equipment for oil and gas and chemical enterprises: oil and gas mining regions of Russia, Belarus, Lithuania.

EXPORT PRODUCTS

- Hydroacoustic complexes and stations
- Ultrasonic level gauge
- Underwater sound projector

SPB EC LTD.

ENTERPRISE DESCRIPTION

St. Petersburg electrotechnical company (SPb EC) is an engineering company specializing in a set of tasks for industrial automation, energy-saving technologies and heat engineering, as well as small and large industrial facilities construction. SPb EC in future is a transnational company that is actively operating not only in Russia, but also in developing countries, both as contractor to western partner companies and independently.

As a result of SPb EC systems implementation, the following occurs: energy consumption reduction, water consumption decrease, costs reduction due to automatic control of technological parameters, protection from emergency situations and operation reliability increase.

Sales area: Russia, CIS countries, Europe, Central Asia, South America

EXPORT PRODUCTS

- Integrated electric power distribution devices
- Integrated power and lighting devices
- Integrated control devices
- Low voltage component devices
- Safety devices for lifting machines

FACTS

 **2003**
establishment of a research institute

 **525 EMPLOYEES**
enterprise staff amount

 **18 COUNTRIES**
geography of operation

> 1,700 PROJECTS
successfully implemented

SPECSTROYMASH LLC

ENTERPRISE DESCRIPTION

Specstroyrash LLC is a machine-building plant for production of wheeled tractors of the fifth drawbar category. Main activity of the company is the production of tractors and tractor-based special equipment. The models of tractors, developed by the enterprise designers, are used both in agriculture and for road construction, timber and gas industry. Gas industry companies, agricultural enterprises, road construction and forest management organizations highly appreciated the reliability and quality of the machines produced by Specstroyrash LLC, used in their work. During the enterprise operation period, more than 15 names of modernized tractors and special tractor-based equipment were developed and produced.

Specstroyrash LLC produces equipment in its own area of 11,600 sq.m. All products have conformity certificates and declarations of the Customs Union. Specstroyrash LLC is included in the list (register) of manufacturers of self-propelled machines kept by the Ministry of Industry and Trade.

Sales area: Russia, CIS countries

EXPORT PRODUCTS

- Special equipment according to individual orders

FACTS

- 2001** start of manufacturing
- 100 EMPLOYEES** enterprise staff amount
- 120 VEHICLES** annual production capacity
- 2011** a mobile houses production workshop launched

TI FLUID SYSTEMS RUSSIA

ENTERPRISE DESCRIPTION

TI FLUID SYSTEMS RUSSIA is a subsidiary of an international holding company, established in 1919 and specializing in the production of fuel and brake systems for automobiles. Today, the company's factories are located in many countries of the world, and the company's customers include all the world's largest car makers.

The Russian division of TI Fluid Systems started operation in 2009 and is engaged in the production of car fuel and brake systems components. Products of the plant are shipped to all key car assembly enterprises in Russia.

EXPORT PRODUCTS

- Automotive components: metal and plastic brake lines, fuel lines, brake booster lines, clutch lines, fuel pump modules for cars

FACTS

- 2009** Start of manufacturing in Russia
- >200 EMPLOYEES** Russian operations staff
- 2 PLANTS IN RUSSIA** In Leningrad region near to St-Petersburg and in Togliatti
- INNOVATIONS AND GLOBAL EXPERTISE** TI Fluid Systems advanced engineering centers across the globe

TIKHVIN FREIGHT CAR BUILDING PLANT JSC

ENTERPRISE DESCRIPTION

Tikhvin Freight Car Building Plant (TVSZ) is the youngest and most updated transport engineering enterprise in Russia. Production capacities: 18,400 of freight cars, 30,000 of car casting sets and 67,000 of wheelsets per year. The plant has mastered production of more than 20 most popular freight wagon models in the market. TVSZ built 16,500 increased loading freight cars in 2018. Over 6 years of work on the CIS railways network, shippers transported almost 200 million tons of cargo in open cars of a new generation by TVSZ (11% more than in old-style wagons).

The company's products are actively promoted in the global market. The plant obtained the status of supplier for the largest railway operator and infrastructure owner in Europe, Deutsche Bahn in 2018, and subsequently signed a contract for supply of multiple-unit flatbed wagons for operation in the European market.

Sales area: Russia, Europe, North and South America, the Middle East, Central Asia, Africa

EXPORT PRODUCTS

- Open wagons
- Flat wagons
- Hopper car for transportation of bauxite
- Components for wagons

FACTS

- 2012** start of manufacturing
- 8990 EMPLOYEES** enterprise staff amount
- 18,400 FREIGHT CARS** annual production capacity of the enterprise
- 130 MLN TONS OF CARGO** transported in TVSZ gondola cars within 5 years of work in the CIS railway network

TOSNO MECHANICAL PLANT OJSC

ENTERPRISE DESCRIPTION

Tosno Mechanical Plant (ToMeZ) is the largest manufacturer of utility equipment, detachable and interchangeable equipment. Production capacity of the enterprise ensures high quality of manufactured products through modern high-performance CNC equipment. The equipment is completed with hydraulic cylinders, a control system, own production brush disks.

The company has the widest range of snow removing boards among the utility vehicles manufacturers in Russia. ToMeZ manufactures equipment for road construction, maintenance of airfields, and performs re-equipment of vehicles registered in the State Road Safety Inspectorate.

EXPORT PRODUCTS

- Detachable and interchangeable equipment of municipal vehicles
- Parts of bucket elevator, hatch for asphalt concrete plant

FACTS

- 1982** Start of manufacturing
- 250 EMPLOYEES** Enterprise staff amount
- THE WIDEST RANGE** Of snowplows among manufacturers in Russia
- 15 TYPES** Combined machines for road maintenance

VECTOR LLC

ENTERPRISE DESCRIPTION

VECTOR LLC is a modern facility producing car trailers "LAV" for transportation of various cargoes (boats, motor-boats, jet boats, quadricycles, motor bikes, snow-scooters, passenger cars, air-cushion vessels, helicopters, special machinery. All products have vehicle type approval of the Customs Union and quality and safety certificates. Bodies and frames of trailers are galvanized, therefore they may be used in any weather conditions.

The company has its own design and engineering department, advanced equipment stock, and wide dealer network. Key customers: public and private entities, individuals.

Sales area: Russia, CIS and EU countries

EXPORT PRODUCTS

- **Car trailers**

FACTS

-  **1997**
start of manufacturing
-  **70 EMPLOYEES**
enterprise staff amount
-  **> 100,000 TRAILERS**
produced by the company since operation start
- > 70 MODELS**
the general product range with regard to modifications

ZAVOD PIRS JSC

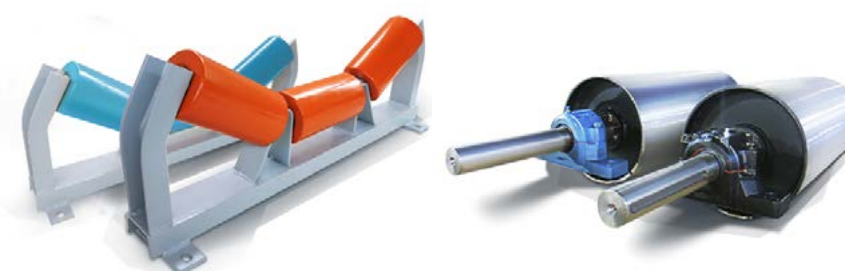

ENTERPRISE DESCRIPTION

ZAVOD PIRS JSC specializes in the development and production of components for conveyor lines: conveyor rollers (the largest share in the production volume), roller supports, drums, roller chains. The products of the plant are manufactured using the latest high-performance equipment in the world.

The proposed solutions help enterprises to reduce the conveyor operation costs. The products have been tested and successfully used at the largest coal mines and enterprises throughout the Russian Federation.

Sales area: Russia, Finland, Estonia, Germany, Poland, CIS countries

EXPORT PRODUCTS

- **Components for conveyor systems**

FACTS

-  **1967**
Start of manufacturing
-  **150 EMPLOYEES**
Enterprise staff amount
-  **1,500 ROLLS**
Daily production capacity
- 3,000 MM**
Maximum length of the rollers produced
